Announcement and Task Instructions

Course:
ITE 17 - Human Computer Interaction 2

Activity:
Interactive E-Commerce Prototyping, Usability Simulation & Web Translation

Mode:
Solo or By Pair

Submission: October 12, 2026 | 12:30 pm

Task Overview

Today, you will design an **interactive low/mid-fidelity prototype** of an assigned e-commerce or booking platform using **Microsoft PowerPoint**, record your demonstration and user testing session using **OBS Studio**, and translate your final interactive flow into functional **HTML, Vanilla CSS, and JavaScript** pages with the assistance of **Gemini** or **Chat-GPT**.

Step-by-Step Instructions

1. **Select Your Topic**

   Select **one** topic from the list below (each pair/solo student must pick a different topic):

   - **Campus Student Marketplace:**
     Buying/selling second-hand textbooks, uniform parts, and school supplies.

   - **Local Delicacy & Pasalubong Shop:**
     Ordering traditional native snacks, regional delicacies, and food gifts online.

   - **Sports Equipment & Jersey Rental Portal:**
     Reserving and renting sports gears, jerseys, and field equipment.

- **Custom Apparel & T-Shirt Printing Store:**
  Selecting shirt colors, custom print placements, and requesting printing quotes.

- **Fresh Farm Produce & Grocery Delivery:**
  Ordering fresh fruits, vegetables, and local farm goods for home delivery.

- **Handcrafts & Artisanal Souvenir Shop:**
  Browsing and purchasing locally made handicrafts, woven goods, and accessories.

- **Tech Gadgets & Computer Accessories Hub:**
  Buying computer peripherals, cables, storage drives, and desktop accessories.

- **Digital Book & Academic Module Store:**
  Purchasing and downloading e-books, course readers, and study guides.

- **Bakery & Custom Cake Order System:**
  Selecting cake flavors, sizes, custom occasion toppers, and scheduling pickup.

- **Hardware & Construction Supplies Store:**
  Browsing tools, building materials, paints, and estimating total costs.

- **Footwear & Sneakers Store:**
  Selecting shoe sizes, colorways, viewing product galleries, and checking out.

- **Coffee Shop & Beverage Delivery App:**
  Customizing drink orders (sweetness level, toppings, size), and ordering for pickup/delivery.

- **Stationery & Office Supplies Store:**
  Ordering notebooks, pens, organizers, and desk accessories in bulk or retail.

2. **Build the PowerPoint Prototype**

   Create a **5 to 8 slide interactive prototype** focusing on a specific user journey (e.g., *browsing items → viewing product details → adding to cart → checkout confirmation*).

   - **Interactivity:** Use PowerPoint **Hyperlinks / Action Buttons** (e.g., clicking a "Buy Now" button links directly to the Checkout slide) to make the presentation fully clickable during slideshow mode.

   - **UI/UX Focus:** Pay close attention to visual hierarchy, button feedback, clear navigation menus, visual consistency, and readability.

3. **Screen Recording with OBS Studio**

   Open OBS Studio and start recording your activity from start to finish.

4. **Web Translation (HTML / Vanilla CSS / Vanilla JS)**

   Translate your PowerPoint layout and interactive flow into a working offline web project:

   - Use **Gemini** to assist you in generating the code structure based on your PowerPoint design layout and user flow.

   - **Requirements:**
     - Must use **pure HTML5, Vanilla CSS, and Vanilla JavaScript** (No external frameworks or libraries, so it can run completely offline directly in any browser).
     - Implement basic interactive features (e.g., button clicks navigating between pages/views, dynamic cart modal, or item counter update using JavaScript).
     - Store your files cleanly (index.html, style.css, script.js, and an images/folder if needed).

Submission Deliverables

Pack all deliverables into a single **ZIP file** named ***HCI2_Task_[YourLastName(s)]*** containing:

1. **PowerPoint File:** .pptx file with working slide hyperlinks/actions.
2. **OBS Screen Recording:** .mp4 or .mkv video file.
3. **Web Code Folder:** HTML, CSS, and JS files (must run offline by double-clicking index.html).
4. **Gemini Prompt Log:** A brief text file or document listing the prompts you used with Gemini to help write/refine your web code.
